

OSCAR SIX

Innovating at the Edge of Science & Technology

Based in Charleston, South Carolina, Oscar Six is a small business delivering cutting-edge solutions in the Science & Technology (S&T) domain. With strategic proximity to key Department of Defense (DoD) facilities, our team brings over 45 years of combined experience supporting high-impact programs for agencies such as Defense Advanced Research Projects Agency (DARPA), Office of Naval Research (ONR), and Special Capabilities Office (SCO) within the DoD.

Founded in 2025 by three former government professionals with deep expertise in S&T, Oscar Six is built on a legacy of excellence in advancing national security and technological innovation. We have supported numerous DARPA initiatives and challenges, providing unmatched insight into how leading S&T organizations operate to create—and counter—technological surprise.

Why Choose Us?

At Oscar Six, we combine our years of experience with technical expertise to deliver mission-driven, innovative solutions that keep pace with the evolving needs of the warfighting community. Below is a sample of some of the services we offer:

- Project Management & Systems Engineering
- Technology Transition & Prototyping
- Field Experimentation & Operational Testing
- Sensor Systems Integration
- Uncrewed Systems (UxS) Development
- Decision Aids for S&T Experimentation
- Data Analytics & Tactical Network Solutions
